Robin Hood Curriculum Compilation

Welcome to our Curriculum Compilation! This compilation celebrates the fantastic work that has happened in our foundation subjects over the Spring Term here at Robin Hood. I hope you enjoy looking at a snapshot of the amazing range of learning opportunities our children have enjoyed since January!

Many thanks for your support,

Mr Overton Curriculum Lead and Deputy Headteacher

Tell us what you think of our Curriculum in this short survey!

Art

Year 3 have developed their skills in pottery by making clay coil bowls.

Year 1 created "stripy floor" collages inspired by Jim Lambie.

Computing

Year 1 (below) have been finding their way around keyboards in the Digital Zone, looking at the basics of typing. They have used both hands to find letters and numbers and have started to find other keys such as enter, space and full stop.

Year 5 (above) have been combining skills from Computing and DT, they used Computer-Aided design to create their own Greek temples. They used Tinkercad to create the temple using tools such as zoom, resize and copy. They then watched their designs come to life through a 3D printer!

Physical Education

In PE, over the previous and coming weeks pupils have been learning a variety of balls skills, including throwing, catching, dribbling and passing. This will lead up to pupils learning how to attack and defend and play games that provide pupils the opportunity to apply tactics and strategies with some problem solving. All pupils have been fantastic and have improved so much!

Personal, Social and Health Education

Our brilliant School Ambassadors collaborated with the children in KS1 in the Ambassador Games. The Ambassadors ran activities at school for half of the day, and then ran activities at Southglade Leisure Centre for the other half. An excellent day!

Religious Education

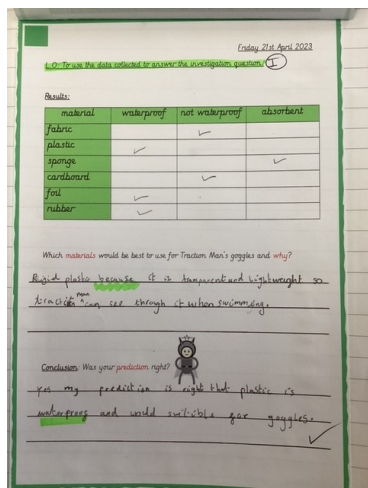

Year 4 practiced playscripts of The Good Samaritan when learning about parables.

All of KS2 visited Arnold Road Evangelical Church for a Bible Exhibition; members of the church community got involved!

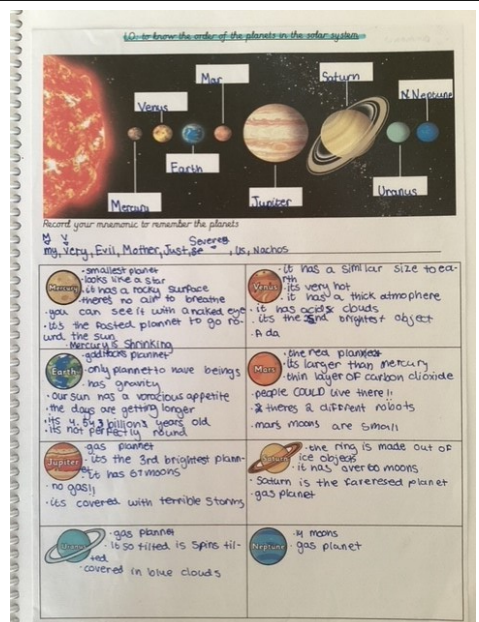

Science

Year 2 (left) have been working hard investigating which material would be the best to make Traction Man a new pair of goggles. They have thought really carefully about how to interpret their results.

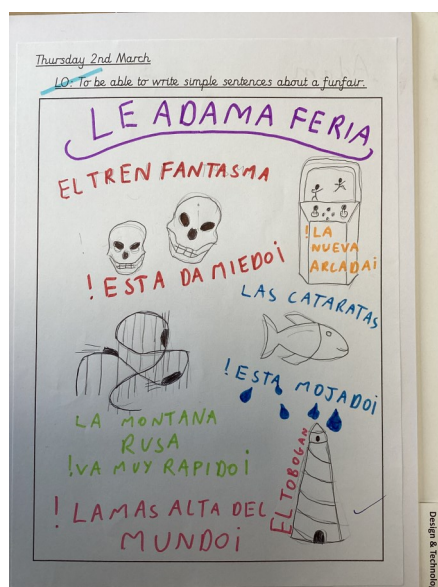

Year 5 (right) have been learning about Space. They have come up with their own fantastic mnemonics to help them remember the order of the planets in the solar system.

Spanish

Year 6 (right) designed posters for La Feria, the fair, with sentences written in Spanish to describe. Can you translate the poster?

In Spanish in Year 5, the children wrote recipes for Kebabs de Frutas—disfruta!

Music

Children in Year 2 (left) have been learning rhythm notation.

All of KS2 had the chance to see the Cambridge University Brass Band (right).

An inspiring and enriching curriculum which broadens horizons...
