

Science is great at Robin Hood when it is...

Inclusive! Science is for everybody in our school community.

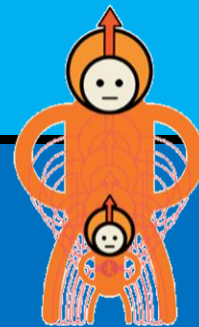

Hands on! We plan and take part in practical investigations. We are active in lessons and use our outdoor space.

Curious! We ask questions and think about how to answer them.

Relevant! We make links to other areas of the curriculum. We can connect what we are learning about to our world, and are engaged in today's scientific community.

Inspiring! We continue our learning at home and consider future careers in Science.

Challenging! Our learning builds on what we already know.

Reflective!

We think about what we have observed, and how we can explain it using our scientific knowledge. We consider what we could change next time.
